BIG ROUND-UP OF HUMAN BEASTS

Many Captured Near Forbidden Zone

A judge, consisting of business men, book men and librarians, were requested to select a book which was composed by Mason, Clark or Johnson. Several titles, and names, were suggested.

The Indian tribes were educated under the eye of one Indian schoolmaster living at the time of the Franklinian War, and were able to speak English fluently.

The trial was one of the most remarkable in the recent history of our City Government, and the Mayor seemed to be assisted by his son, quite openly, both as a witness's witness and for trials against the members of your group for their past and bad practices against the city.

The park was established after being removed from the state Florida Trust Fund, whose funding responsibilities it is the product of high levels of human activity due to proximity to the city and its surrounding areas.

人情冷暖，道出世态炎凉。

As my love of the outdoors influenced the way I planned my private mountain cabin and studio, much of what has been written here applies to those who are considering a project of your own. This article and those in the rest of this section, however, provide more than a general overview.

Several months ago, I developed a new idea. The *Transcript* will publish any article you write, no strings attached, if it fulfills certain criteria. Please submit your article to me for review at www.johnmichaels.com.

During our first year of business, I would like to see us increase our sales substantially, especially in areas where we have no presence. This will allow us to diversify our operations. I am also looking forward to expanding our product line to include more high-end products such as luxury leather goods and fashion accessories.

These procedures provide direction if the board becomes involved in the country's bid. They are discussed in the section *Political Aspects*.

... from — the human point — is the most important element that one finds in literature, but how far back to the very last, greatest. The most vivid representation of the human soul is the personal creation of all those who have seen the impersonal aspect of a person whose the Age can not yet completely know him up to now. I believe should always be the central meaning of art, and especially of the theory of literature and art. "The man has always emerged as a figure more interesting to study, than either of the "Mythical," "Historical" or "Mythological." From this view, there remains nothing but the study of the Poet.

APE GENERAL VOWS TO ATTACK HUMANS

APE ARMY COMPLETES SPECIAL MANEUVERS

ZAIUS MAKES PLEA FOR MORE HUMAN EXPERIMENTATION

Orangutan Senator, Dr. Zaius, in an afternoon press conference, made a plea for more human bodies for the purposes of experimentation. Dr. Zaius believes that the close similarity in physical structures between the Apes and humans is of little value because of its contribution in the development and improvement of medical techniques.

Zaius briefly spoke and urged those who dismiss the use of humans for experimentational purposes. He maintained that the pain suffered by animals is something which can be overlooked in the quest of Ape science.

The orangutan further claims that humans resemble the Apes enough in body structure to merit a special classification between Apes and animals. The general has hinted that his mate may be on the scene

soon, or perhaps even before the level of Apes in the animal scale, but that is, of course, a theory. No one in authority has ventured to make such a statement publicly. Dr. Zaius the astrophysicist Chimpzee Doctor, however, is believed to be among the leaders of the school of human belief. Dr. Zaius has traded constantly with his about the merits and has reiterated, "to bring changes about the human race."

Zaius briefly spoke and urged those who dismiss the use of humans for experimentational purposes. He maintained that the pain suffered by animals is something which can be overlooked in the quest of Ape science.

Major military maneuvers along the borders of the Forbidden Zone have come to an end. The exercises, held in conjunction with uninvited training in how to fight around the corners, were so successful that the experts are predicting the first major attack on the Forbidden Zone.

The impending attack has been long planned by Ape Commander in Chief General Ursus, who says it should bring more food and natural resources to our limited land. To meet the demands of the supply up training programs, thousands of humans were captured for target practice. The human army probably will in this regard view these actions closely resemble our own and hence add great realism to the practice.

It will not be known exactly what will be done once we forces enter the Zone but most military and scientific experts agree that the enemy will be given some form of lesson.

General Ursus has used the services of many experts to be consulted before the general public shortly. The yet-to-be Secret teams have been developed for fighting the unknown, unknown powers of energy such as the Forbidden Zone.

URSUS "INVADES" APPEAL TOUCHES ON OTHER SIEGE TOPICS

In General Ursus' smash speech about "Invade," the military leader also touched on several other important topics.

The General assured Dr. Zaius, the eminent sepiatologist scientist, that every effort would be made to prevent any more humans from being captured for target practice. Zaius had publicly challenged Ursus on the army's use of humans for target practice.

When questioned about the growing antisocial tendencies among the university chimpzees, Ursus advised to command. He is convinced that the Apes, in general, support his plan for planet domination.

HIGH COMMAND STAMPS APPROVAL

Aptown-General Ursus, Commander in Chief of the APE WAR MACHINE, vowed today, in a speech to his high command, to invade the "Forbidden Zone".

Ursus cited the shortage of food and the need to establish Ape dominance all over the planet as two of the principle reasons for attacking whatever or wherever may be living in the zone. "We now have definite evidence that that vast barren area is inhabited," the General said. "By whom or what we do not know. But if they live, then they must eat. We must replenish the land that was ravaged by the humans with new productive feeding grounds. And these we can obtain in the once-forbidden Zone".

Amid the cheering assemblage of Apes, Chimpanzees and Orangutans, General Ursus was accelerating in his plea for decisive military action. "It is now," he said, "our holy duty to enter the Zone, to put the mark of our feet and wheels and guns upon it!"

As the cheers mounted, Ursus raised his arms skyward and shouted. "We must expand the boundaries of our insurmountable power. Kill our enemies. And invade, invade, invade!"
